

Developing a Common Language for Self-Awareness

Using the Myers-Briggs® Assessment at Sony Corporation

Sony has greatly revised its system of human resource cultivation since 2003 and has developed individual programs in each business sector in accordance with the environment, as well as a system of cultivation for each employee level. In the Semiconductor Business Gp, a section that brings in 100 people each year, both new and experienced employees, Sony has promoted program development focusing on team formation. Sony determined that the improvement of self-awareness is the most important aspect of team formation and has been focusing their efforts on this.

APPLYING THE MBTI® ASSESSMENT AS A STANDARD TOOL FOR IMPROVING SELF-AWARENESS

Many programs have been implemented for the improvement of self-awareness. Most of these are based on transactional analysis; however, some programs utilizing other theories and focusing on specific target groups have also proved effective.

One problem often mentioned by people in charge of cultivating human resources is that “participants respond very well right after the workshop, but as time passes, they tend to forget.” This change over time colors the general image of the program and results in negative opinions—such as “improvement of self-awareness is not effective” and “it is meaningless to promote self-awareness”—which can become a major obstacle to the program’s implementation.

Like other assessments, the *Myers-Briggs Type Indicator*® (MBTI®) instrument cannot avoid this disadvantage over time. However, because its basic structure is based on Jung’s theory, which is deep and universal, training participants can check the principles at any time as long as they have been given and retain the feedback materials, such as the *Introduction to Type*® booklet. In addition, of course, Sony’s experience has shown that if feedback is properly provided and type concepts—including type dynamics and development—are thoroughly explained by a type expert, it is possible for employees to retain the knowledge and even expect to develop new awareness as time passes. As a result of this, the Semiconductor Business Gp was able to adopt the MBTI assessment as a standard tool for self-awareness improvement.

IMPLEMENTING FROM THE TOP DOWN

Sony’s Semiconductor Business Gp asked Ms. Yuki Sonoda, president of IPDS Co., Ltd., and developer of the Japanese version of the MBTI assessment, to plan, develop, and carry out a two-day personal development program for its executives and department heads. The program would include administration of the MBTI instrument. This initial implementation with higher-level employees was intended to facilitate dissemination throughout the various levels of the division. The program was well received from the beginning. Although some participants initially were reluctant to view themselves within the framework of psychological type, most attendees attested to the efficacy of the program by the end of the course and, after returning to their offices, reported that “It was truly wonderful.”

“Although some participants initially were reluctant to view themselves within the framework of psychological type, most attendees attested to the efficacy of the program by the end of the course and, after returning to their offices, reported that it was ‘truly wonderful.’”

—Yuki Sonoda,
President, IPDS Co., Ltd.

Encouraged by the success of the initial program, Sony decided to implement a four-hour feedback course for rank-and-file employees provided by in-house certified MBTI facilitators under the supervision of Ms. Sonoda. This course has proven very popular and often fills up within 20 minutes after registration opens on the in-house Web site. Some department heads who took the personal

development course requested a short course for all the workers in their departments. In the first of these, all 40 employees from the department participated in the session. At present, most department head-level employees and half of their administrative assistants have completed Sonoda's two-day personal development course. Because it was promoted fully rather than gradually, the MBTI assessment became popular among employees by word of mouth. It is often selected on training department questionnaires as the course employees most want the company to provide.

EXPANDING THE POOL OF IN-HOUSE CERTIFIED USERS FOR FASTER DISSEMINATION

At the same time, Sony is expanding the number of in-house certified users, concentrating on the personnel section in order to disseminate the MBTI assessment throughout the company within a short period. Fifteen in-house certified users were participating actively as of August 2005, and Sony plans to more than double that number, including individuals in group semiconductor companies, within the year. The four-hour courses conducted by the fifteen certified users have received high praise from attendees, many of whom have mentioned that they would like to deepen their understanding of MBTI concepts.

LOOKING AHEAD TO AN ADVANCED PROGRAM

Employees at the executive and management levels who took courses in the early stage requested MBTI assessment follow-up courses and expressed a desire for team-building programs applying MBTI type theory. In response, Sony asked Sonoda to plan, develop, and conduct an advanced personal development program focused on improving communication using the MBTI assessment. After attending a trial version of the course, members of the personnel department, who were already acquainted

with the MBTI tool to varying degrees, commented that they found new meanings that showed the depth of the instrument.

MEETING THE NEED FOR REGULAR MAINTENANCE

In addition to the new advanced course, Sony is planning for a regular maintenance program for all employees who have completed the two-day course and short session. Various ideas have been suggested, such as offering a one-day version of the course and implementing the advanced version including type dynamics. The program will be reviewed every three years, and Sony will make adjustments for continued improvement.

About CPP, Inc.

Since its founding in 1956, CPP, Inc., has been a leading publisher and provider of innovative products and services for individual and organizational development. CPP has been supplying reliable training solutions to businesses of all sizes, including the Fortune 500, for more than 50 years. The company's hundreds of unique offerings have been used by millions of individuals in more than 100 countries, in more than 20 languages, to help people and organizations grow and develop by improving performance and increasing understanding. Among CPP's world-renowned brands are the *Myers-Briggs Type Indicator*® (MBTI®), *Strong Interest Inventory*®, *Thomas-Kilmann Conflict Mode Instrument* (TKI), *FIRO-B*®, *CPI 260*®, and *California Psychological Inventory*™ (CPI™) assessments.

Myers-Briggs Type Indicator, Myers-Briggs, and MBTI are trademarks or registered trademarks of the MBTI Trust, Inc., in the United States and other countries. Strong Interest Inventory, FIRO-B, CPI 260, and the CPP logo are registered trademarks and California Psychological Inventory and CPI are trademarks of CPP, Inc.
